Getting Started Intro to Voice AI

Today we'll explore the world
of **artificial intelligence** - or AI.

Then, we'll get hands-on and
build our own Alexa skills!

Lesson 1: Intro to Voice AI

LAUNCH

Why AI?

What we'll cover in today's lesson.

VIDEO

AI Basics

AI is everywhere but how does it work? A closer look at voice AI.

MISSION 1

Hello Moon

Let's get hands on with a real voice AI and get it to say hi!

MISSION 2

Space Facts

Level up to code a space fact generator using voice AI.

WRAP-UP

Going Deeper

Let's deepen our understanding of how AI works in Alexa

Do Now: Let's Discuss

Who has heard of the term
“**artificial intelligence**”
– or AI?

What do you already know about
“**artificial intelligence**”?

**Artificial
intelligence** is the
development of computer
systems to perform tasks
that normally require human
intelligence.

All around us, AI
is at work **helping**
make people's
lives easier, often
without our even
realizing it.

Every day, when
you.... do an
internet search,

or scroll
through your
newsfeed,

Skills Inventor

LAUNCH

or speak into
a phone to
ask questions,

use facial
recognition to
unlock a phone,
AI is at work.

Self-driving cars use AI to recognize their surroundings, track objects, and make super important decisions like when to stop.

AI is helping
improve how
we grow food,

Skills Inventor

LAUNCH

how to save energy, and

Skills Inventor

LAUNCH

and how
we diagnose
diseases and
create new
medicines.

Voice AI

One of the most impactful ways AI is used is through **voice AI**, through personal assistants like Alexa.

We'll explore this technology and more in today's lesson.

INTRO TO VOICE AI

AI Basics

How does voice AI work?

Video Vocabulary

voice ai: technology that recognizes human voices, interprets their meaning, and offers a response in return

wake word: a pre-programmed word that triggers a voice AI device

utterance: a question or command a user makes to a voice AI

intent: the desired response to a question or command made to a voice AI device.

AI Basics: Voice AI

That was awesome! We are starting to explore how a voice AI like Alexa needs to be programmed with **wake words** and how **utterances** (the questions you ask) trigger an **intent** (your desired response).

WAKE WORDS	UTTERANCES Things You Might Say	INTENT Your Desired Response
"Alexa" "Amazon" "Computer" "Echo" "Ziggy"	"What time is it?"	"The time is 3:45pm"
	"What's the hour?"	
	"You got the time?"	
	"What hour is it?"	

Now, it's time
to build our
own **Alexa skills**
using voice AI!

ACTIVITY 1 — Hello Moon

amazon future
engineer

PROJECT
STEM

Code an Alexa Skill using voice AI that can say 'Hello Moon'.

- You can try to follow along, but **don't panic** if you get lost. We will go over it all after.
- Write down **key vocab** on your sheet.

review

TIME

function: a block of reusable code used to perform an action

string: a series of characters like letters or numbers

“**Alexa**, tell **moon talker** to [.....]” → triggers an **intent**

↑
wake word

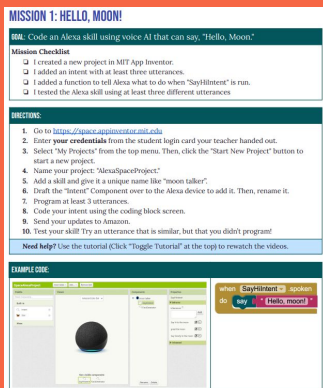

↑
skill name

↑
utterance

Mission 1:

Code an Alexa Skill using voice AI that can say 'Hello Moon'.

Use worksheet for tips.

*****HINT:** If you can't find the gold intent block, select it from the Alexa portion of the library - not under "Control" blocks.

Today's Activity: Completed

**Completed your mission?
Congratulations!**

You just used voice
AI to code your first
Alexa skill today.

Now, it's
time to level up
with another
challenge!

The background of the slide is a cosmic image featuring a vibrant nebula with orange, yellow, and green hues against a dark blue space filled with stars. A large, solid orange rectangular box is positioned on the left side, serving as a backdrop for the main title text.

INTRO TO VOICE AI

Mission 2: Space Fact Generator

Skills Inventor

ACTIVITY 2 — Space Fact Generator

Mission 2:

Code an Alexa skill that generates fun space facts using voice AI.

During video:

- You can try to follow along, but **don't panic** if you get lost. We will go over it all after.
- Write down **key vocab** on your sheet.

Video Vocabulary

variable. a value that can change

Mission 2:

Code an Alexa skill that generates fun space facts using voice AI.

Example facts:			
Sunsets on Mars are blue	Space is completely silent	Mars has water too	One million Earths can fit inside the Sun

Today's Activity: Completed

**Completed your mission?
Congratulations!**

You just used voice
AI to code your second
Alexa skill today.

GOING DEEPER

Understanding the AI in Alexa

Skills Inventor

WRAP-UP — Future Voice of AI

amazon future >>
engineer

PROJECT
STEM

Understanding the AI in Alexa:

Let's take a closer look at how artificial intelligence works inside Alexa. Then we'll wrap up with a discussion.

Video Wrap Up

- Why did Amazon choose the name “Alexa”?
- How does Alexa learn new words?
- How does Alexa know when to listen?
- What’s something Jeff wants everyone to know about Alexa?

Lesson Wrap-Up: Let's Discuss

review

TIME

What's **something you learned** today that you didn't know before?

What **surprised you** most?

What would you like **to learn more** about?
